

TITLE: EMPOWERING YOUNG PEOPLE IN THE AGRICULTURAL AND ECONOMIC SECTOR IN ALBANIA

13th International Conference of Ecosystems (ICE2023), June 9-10, 2023

¹Dr. Eralda NOCKA

²Dr. Alerta BASHA

SCOPE OF THE STUDY

Overall aim: To highlight the role of agrarian markets and the necessary opportunity for their efficient organization, functioning and management for the benefit of agricultural producers.

Specific objectives:

- To acquaint the participants with the definition, the criteria for the classification of agricultural production and its features in contrast to other branches of the national economy.
- To provide knowledge on the types of agrarian systems, their features and the possibility of their development in different regions of the country in accordance with the climatic conditions and biological characteristics of the factors of production.
- To highlight the features of agricultural developments in our country now and for its future..
- To provide knowledge on the system of factors that condition agricultural production.
- To acquaint young people, participants with the concepts of technical progress in the field of economic-productive organizations in agriculture, highlighting the impacts in this direction.

Example n. 1

Funding in agriculture from commercial banks and financial institutions.

"AGRO FUNDING THAT IS OFFERED BY CREDINS BANK"

Guidelines, orientations and advice in order to benefit from and use:

CREDIT FOR LIVESTOCK AND AGRICULTURE

We help you grow your business by providing financial support for:

- Investments in greenhouses and storing facilities.
- Various livestock equipment (milk refrigerators, milking system, etc.)

Purchase of agricultural and livestock inputs.

- Financing for the purpose of developing and expanding agricultural activity.

- Opportunity to repay the loan in basic installments in accordance with the production cycle.

AGRITOURISM CREDIT

We assist you by providing you with financial support for various products and investments in agrotourism development.

Funding for new investments in the construction of premises.

Investment in new machinery and equipment.

Technical advice and guidance to make the right investments.

Facilitating conditions for Agrotourism activities.

Example n. 2

Guidelines, orientations and advice, in order to benefit from and use:
FUNDS OF THE IPARD GRANTS SCHEME, FOR FARMERS AND AGRIBUSINESSES.

IPARD grant scheme and the impact on the rural sector,
The funds of this scheme are available to farmers and agribusinesses.
Thanks to this scheme today we have significant investments in farms, machinery, production lines and other assets according to the relevant measures.

"It's been a year and a half since this scheme has made a great contribution to the investments that are being made in the rural sector. In the first IPARD Call, we contracted 25 million euros, so it is necessary to orient ourselves properly in order to benefit easily."

STUDY RESULTS

Professional competences.

Studying and acquiring the information provided through this training module makes it possible for the participants to master the necessary competencies related to the design, construction, proposal and implementation of the most effective production structures.

For the regions or economic-production areas in accordance with the strategies of agricultural development for the period 2014-2020.

These lead to a more efficient use of all factors of production, increasing production and reducing the cost per unit of product.

They will be able to perform various analyzes of agrarian markets and related links with the demand-supply of agriculture, while giving the necessary recommendations for the regulation of various situations in this specific sector.

ONCLUSIONS

Training competencies and impressions obtained.

Young people and participants will be able to successfully engage in various fields, according to employment opportunities in: Municipalities, Directories of Agriculture, Prefectures, Rural Development Agencies, farms or agribusiness, etc.

-They will have the opportunity to easily adapt to the nature of the respective problems and gradually gain the right experience to perform analyzes, confrontations, independent research and in a group of specialists, etc.
