ABSTRACT

Our paper will present suggestions for suitable models for developing clusters today. Development and great contributions of industrial clusters are undeniable. However, the process of developing industrial clusters in Hanoi still has many challenges and inadequacies. Our study shows that, we can analyze some models, however, there has been considerable debate concerning its effectiveness, and indeed its appropriateness as a policy framework. And It is necessary to regularly organize and integrate regulations on consumer protection in many relevant documents and fields. Last but not least our analysis can be applied for many industrial clusters (IC) in Vietnam not only in Hanoi city.

Key words: physical infrastructures, clusters, suitable models, Hanoi, protect consumers
